Warning -- Grade is invalid for salary plan or salary ranges are missing on job row 2015-04-01. (1020,5)

When salary plan and salary grade are assigned default values, it is possible to generate an invalid combination for an employee. If the salary grade table entry is not found, or no ranges have been entered, this warning will be produced.

Check the employee's salary plan and grade and change grade to a valid entry on the salary grade table using an F4 prompt. If the entry you have chosen is valid on F4, but no range data is present on the table, you may want to update the Salary Grade table to include appropriate salary ranges.
